

Elliott Everson, CPSA, CPX

Living in Arizona for most of my life, the landscape, plants and animals of the southwestern desert have inspired much of my art. While traveling extensively throughout the United States and internationally, I always find new inspiration and subject matter including African animals and scenes, pets, musical themes and even some abstraction. Working with colored pencil on paper, wood and stone I strive to create my own vision of the plants, animals and the natural world.
